

## ARCH-FRAME PRESS

**PRESS**

**100 T**

Our entire range of presses have a cast iron frame which simultaneously give them robustness and great stability when using cutting or bending tools.

One option is to integrate a variable trajectory with five different trajectories.

The operating speed ranges from 50 to 250 strokes/min (according to the trajectory).

They can be easily adapted to your needs, by inputting your specific installation requirements (feeder, discharge conveyor, various controls, etc.).

CAPACITY	Mini	Maxi
Speed (str/mn)	50	250 (Depending stroke)
Tonnage	0	100 tonnes
Height adjustment	0	70 mm
Fix or variable stroke (mm)	30	80
Table surface	1500*1150mm	
Front passage	1600mm	
Dimension	H=3900 * P=2260 * L=3200	
Total weight	30 tonnes
