

Our welding heads were developed to be integrated into whichever type of machine: sliders, presses, welding bench, etc.

### AVDANTAGES:

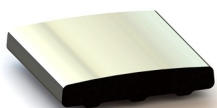

- ▶ Line or profile welding
- ▶ No limit in terms of depth of edge of bank
- ▶ DC generator
- ▶ Two safety controls: end of feed and billet presence
- ▶ Profile kits for changing the size or type of equipment to be welded and the shape
- ▶ Pressurization with a large-trajectory spring

	Model	Max. billet size	Line diam.	Speed
NC line and profile welding head	TAS 10-8	0 to 10 mm <sup>2</sup> // thickness 1.5	1,5mm	Vmax: 400 strokes/min

### MATERIALS WELDED:

Line

Convex profile

Flat profile
