

FORMING HEAD/SCREW INSERTION

TAT 120-10

Our TAT 120-10 digital forming heads perform belt tapping from M3 to M10 and are fully programmable thanks to the rotating motor assembly independent of linear motion. This module also allows the insertion of screws on subassemblies.

CAPACITY	
Speed	from 5 to 150 St/min
Trajectory	from 0 to 130 mm
Lubrication	Via SKF micro-nozzle + oil suction
Tapping control system	Mechanical lever

Please contract us for any higher requirements
