

Our welding heads were developed to be integrated into whichever type of machine: sliders, presses, welding bench, etc.

AVDANTAGES:

- ▶ Line or profile welding
- ▶ No limit in terms of depth of edge of bank
- ▶ DC generator
- ▶ Two safety controls: end of feed and billet presence
- ▶ Profile kits for changing the size or type of equipment to be welded and the shape
- ▶ Pressurization with a large-trajectory spring

	Model	Max. billet size	Line diam.	Speed
NC line and profile welding head	TAS 30-16	10 to 36mm ² // thickness 3	3mm	Vmax : 250 Strokes/Mn

MATERIALS WELDED:			
	Line	Convex profile	Flat profile
