

ELECTRICAL PRESS

**PRESS
20-40T**

Electric stamping press have been developed to be integrated on multislide CMP or special stamping modul that does not require more than 300 cycle/ min of max speed.

Module frame cast iron version.

The module is controlled by a numerical axis which can rotate at a very low speed (Ex:Strip engage).

An effort measuring system is available to prevent damage due to improper setting.

The presses are available either as continuous rotation or tilting presses.
